Subsea umbilical cable

Integrated Subsea Booster Power Umbilical Cable

Subsea umbilical cable

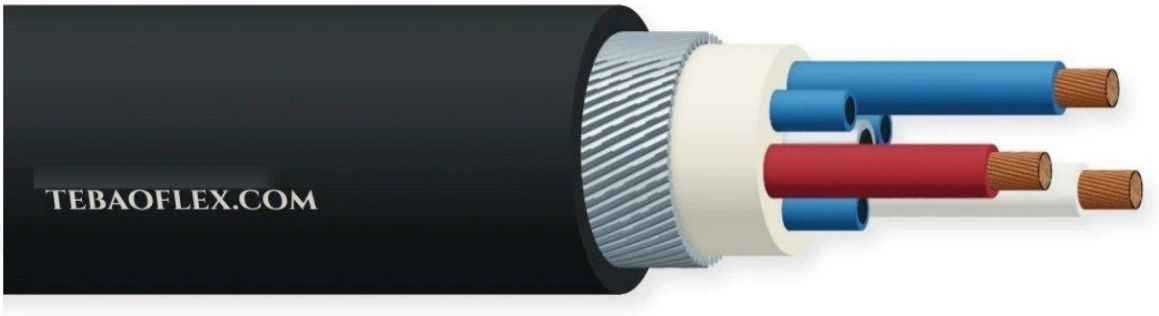

Subsea umbilical cable | Order-specific design

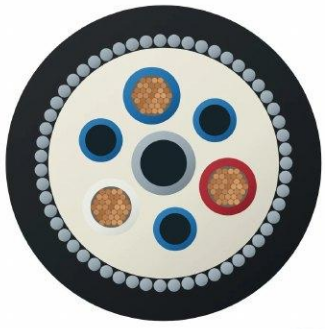

Application

Combined subsea service connection for power, signals, optical elements or fluid lines. Component mix and mechanical design follow the project configuration.

Typical uses: Oil and gas, Marine and offshore, Condition monitoring

Construction

Cross-section, not to scale

1	Conductor	Tinned copper
2	Insulation	Polymer insulation
3	Hydraulic and signal elements	Application-specific elements
4	Outer sheath	Application-specific polymer

Technical data

Typical values

Service profile	Installation-specific duty	**Water exposure**	Specify depth, pressure and water chemistry
Chemical compatibility	Verify against the actual fluid and temperature	**Standards**	Order-specific design

Sizes

1 standard constructions

Tick the sizes you need and send this page to info@tebaoflex.com or WhatsApp +86 185 9591 3361.

	Configuration	Rated voltage	Insulation	Outer sheath	Core arrangement
☐	**Integrated Subsea Booster Power Umbilical Cable**	–	**Polymer insulation**	**Application-specific polymer**	**Power and signal elements**

– This reference row describes a construction, not an orderable size. Provide the required core count and cross-section with the enquiry.

Standards and approvals

Certifications

Management systems: ISO 9001, ISO 14001, ISO 45001

Request a quotation

Send the size, length and destination. An application engineer replies within 2 business hours.
